At MJ Custom Engineering we pride ourselves on providing comprehensive solutions to our clients, right from concept and development through to commissioning.

We work for a wide variety of clients, designing everything from large processing plants for the aggregate and recycling industries, to truck decks and contracting equipment for the agriculture and civil sectors. We also provide full repair and maintenance services for equipment you already own.

Our Palmerston North based workshop is fully equipped to manufacture or repair anything that comes through the door. We take advantage of our large in house CNC profile cutting

machine, High capacity CNC lathe and CNC Mill to efficiently produce components to a high standard.

All our projects are fully cad designed prior to manufacture, this highlights any possible problems and means no rework while in production. It also shows the customer exactly what they will get so everyone is on the same page.

If you're looking for effective, top quality solutions contact us for a free non-obligation quote.

More than eleven years after starting Dannevirke Dairy Supplies, owners Paul Andersen and Lance Gundersen are proud to be offering their customers market leading farm systems and outstanding service with a local feel.

From a retail shop and service centre located at 386 High Street Dannevirke, Paul, Lance and a team of farmers, engineers and qualified machine testers deliver sound advice and tailored farm solutions from Eketahuna to Wairoa.

The company supplies and installs everything to meet the demands of farming; as well as the refurbishment and servicing of all milking plants, all tailored to the individual farmer's needs and budget.

Dannevirke Dairy Supplies also installs and services effluent and water schemes, in-shed feed systems and provide a wide

range of pumps and parts; all backed up by a 24 hour 7 day on call service.

In addition to this, Dannevirke Dairy Supplies also has an electrical division which caters to all your farming and domestic electrical needs.

Dannevirke Dairy Supplies is committed to your region and to your existing and future farm needs. You'll see the latest farming technologies in store at DDS and we are sure you'll appreciate our ability to service all products we sell.

McLean Ground Spread has been operating in the Tararua district for over twenty years.

We are well known for our bright green fleet of late model Mercedes spreader trucks that are the only trucks in the district with the latest twin chain bins, allowing us to turn off one side for accurate spreading around waterways, lanes and other areas.

All of our trucks run trac map GPS systems for proof of placement.

If you would like to get in touch with the owner/driver contact
